

AnnoNu

connecting with the community

Strategic Plan 2026-2030

About AnnoNu

The schools within the AnnoNu school group collectively form a network of primary schools, each with its own character and educational approach. What unites us is our belief in the potential for growth of both children and professionals. Guided by a shared vision, we work together to provide high-quality education and supporting the meaningful development of every child.

With this vision in mind, each school has the freedom to make choices that suit its pupils, its local context and its educational approach. At the same time, we work together on what unites us: high-quality education, delivered by passionate and expert teaching professionals.

We are guided by three core values: trust, connection and professionalism. We actively seek to connect with one another and with the world around us. Rooted in strong mutual trust, we continue to learn, develop and innovate, so that we can continue to offer the best education tomorrow.

Our path towards 2030

Society is changing rapidly. Children are growing up in a world that is becoming increasingly diverse, digital and complex. This calls for an education system that provides a solid foundation and prepares them for the future – one in which pupils learn to live together, explore, cope with change and develop their talents.

That is why we are continuing to build schools that are at the heart of society. With professionals who continue to learn and develop, students who are curious and resilient, parents who are involved, and schools that provide space for tranquillity, connection and interaction.

Together, connecting with the community.

Successful, skilled, adaptable and dynamic education professionals

Strong professionals make strong schools.

Technology enhances our expertise.

Learning continues beyond the student.

Job satisfaction creates scope for growth.

Curious and resilient students

We empower students to discover who they are and what they can achieve.

Curiosity is the starting point for learning.

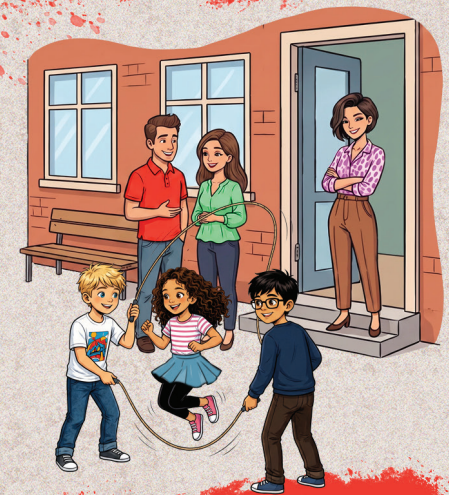

Resilience helps students to grow, even when things get tough.

A solid foundation and an open mind, prepare students for tomorrow.

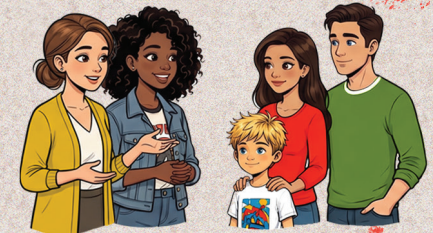

School as a haven of tranquillity and a place for learning and socialising

A welcoming place: peace as a foundation, connection as a strength.

Learning together, living together.

Collaboration between the school, parents and the school's partners.

Successful, skilled, adaptable and dynamic education professionals

Our professionals make the difference. We believe it is important to strike a healthy balance between work, professional development and wellbeing. That is why we invest in their development, expertise and well-being. We encourage a learning and inquisitive mindset, strengthen expertise within and between schools, and make the most of the opportunities offered by technology. In doing so, we draw on insights and experiences from regional, national and international networks. This ensures our education professionals remain adaptable, energetic and well-prepared to deliver the best possible education, even in a changing world.

Curious and resilient students

We want every child to feel seen and to be able to develop to their full potential. That is why we provide a learning environment that embraces differences, talents and discoveries. We strive for inclusive education wherever possible and offer extra support when needed. We lay a strong foundation in language, maths and other key skills. At the same time, we encourage students to be curious about the world around them, to treat differences with respect and to tackle challenges with confidence.

School as a haven of tranquillity and a place for learning and socialising

Our schools are at the heart of the local community and are much more than just a place to learn. They are familiar places where children, parents, professionals and partners come together. A place that offers peace, safety and trust in a world that is constantly changing. Building on that connection, we work together to support children's development and to build strong networks around the school.
